

Sears Market Place / Sweetwater Logistics Integration Guide

Before Sweetwater Logistics can automatically pull orders from your Sears Marketplace store you will need to enable access to your stores Application Programming Interface (API). Sweetwater Logistics will require the email, password and Location Ship from ID. You also will need to configure two main items for automated fulfillment. Those being Sku's and Ship Methods.

Gathering Email and Password

The email and password are the same that you use to access the Sears administrative account.

Gathering Location Ship From ID

To gather the Location Ship From ID:

Click on the down arrow next to your account name at top right.

Click on Fulfillment Locations.

Click on Edit next to the existing fulfillment location.

Copy the Location Ship From ID.

Saved Location(s):

| | |
|-----------------------------|--|
| Dropstream Default Wareh... | Seller Warehouse (109395331) Status: Location - Approved |
|-----------------------------|--|

Location Type:

Location Name: 

Location Ship From ID: 

Email the email address, password and Location Ship From ID to API@sweetwaterlogistics.com with the subject line of : (Your Company Name) / Sears Marketplace Integration. You should also send the ship methods from below as well.

Configuring SKUs

Stock keeping units (SKU) are merchant defined codes used to uniquely identify products in a warehouse. It is critical that the SKUs defined in Sears match exactly to the SKUs loaded into your warehouse management system.

To obtain SKUs from your Sears store:

1. From within Sears Admin, click **Products > Browse and Edit**
2. Select a category and click on **Load Catalog**
3. Click on **Edit**
4. Click on **Offers**. The **Item ID** field represents the SKU number that will be managed in the fulfillment center warehouse.

Note: Once a SKU has been defined for a product in the Sears store, it cannot be modified. To assign a new SKU, it is necessary to delete and re-create the product with the new SKU number.

Gathering Shipping Methods

To gather the shipping methods:

1. Click on **Products > Browse and Edit**
2. Select a category and click on **Load Catalog**
3. Click on **Edit**
4. Click on **Offers**. The Shipping Methods are displayed on the Edit product page. These are the text strings that will come across to Sweetwater Logistics (Ground, 2 day, Next Day).

The screenshot displays a section titled "Your pricing vs competition" with a progress bar showing three segments: green for "Most Competitive", yellow for "Marginally Competitive", and red for "Needs Attention". Below this, it states "Whichever price is active (standard vs. sale) will be used for this competitiveness calculation." Underneath, it shows "Lowest competitive item price found" with "Item Price: \$9.99" and "Shipping price: \$5.00". At the bottom, a red box highlights the "Shipping Methods" section, which includes "Ground", "2 day", and "Next Day" options, each with a "not supported" checkbox. Below the shipping methods, there are input fields for "Fiat Rate Shipping (optional)" with values of \$5.00, \$10.00, and \$15.00.
